(54) Title: ROTARY DISTRIBUTOR, METHODS FOR ITS USE AND THE USE OF THE DISTRIBUTOR

(57) **Abstract:** There is described a rotary distributor for use in spreading solid particles and/or liquid from an agricultural machine, comprising a round distributor having outlet holes arranged peripherally in the horizontal bottom of the housing and connected to outlet pipes 3, a first supply pipe 4 arranged centrally in the bottom of the distributor housing 1 for the supply of liquid under pressure and connected to a vertical, rotatably supported hollow rotor shaft 5 in flow communication with a first transverse hollow rotor arm 6 which has at least one angled, downward-directed nozzle 7 that is level with the outlet holes 2. The distributor housing further comprises a means 10, 11 for introducing and distributing solid particles such as seed corn.
